Afrikaans	good	good	good

Hobbies/Interest/more about myself

My hobbies and interests include reading, coding/programming and listening to music. Reading is an interest that is linked to the desire to learn and grow. I aim to get better with maintaining my reading hobby. Coding is a fun hobby to grow in and I aspire to make more projects with JavaScript and grow in styling skills. It is my desire to grow in the tech industry and to create apps and websites. Music is my stress reliever and it helps me focus as a code or do any type of work. It contributes to my mood of the day.

Education and qualification

<u>Secondary education</u>

Matriculated in 2017: Rand Park High School

Subjects: English, Afrikaans, History, Business Studies, Geography and Life Orientation

<u>Tertiary education</u>

I attended Boston Media House, Sandton in 2018. I couldn't proceed with studies due to finances.

Self:

Front-End Web Developer

Having the ability to create websites with simple HTML, CSS and Javascript all the way to using libraries such as React that illuminate user experience and user interface. I am eager to tackle web development/design challenges to achieve lasting impacts on user experience as well as to make a contribution to a team.

Passions: I am passionate about building applications with more frameworks for easier user experience and I keen to grow in the skill set i have with use of other libraries and frameworks.
Interests: Database integration, Application building (the goal is to make more applications with React and Flutter).

Skills

Technical skills:
- HTML,CSS
- Javascript
- React.js
- Node.js
- REST API
- Bootstrap
- Express.js
- Git & Github useability

Other qualities:
- Analytical
- Good time management
- Good Communication
- Looking forward to Learn
- open to feedback and correction
- Aware of personal limits

Education

- **High School:**Matriculated in 2017 from RandPark High school
- **Tertiary:**Attended Boston Media House in Sandton from 2018-2018
- **Self-taught:**Began coding with Udemy course (ZeroToMastery) purchase in 2020 and Youtube videos and lastly HyperionDev FullStack Developer Bootcamp.

Projects

The projects are mentioned below according to personal interest and enjoyment. They may be viewed on my personal Github page.

- Ecom Website
  HTML, CSS, JavascriptThis website is interactive. It displays the products for user experience to be easy and simple. It includes functionality to the shopping cart and includes styling making it simple yet interactive.
- **Weather App**
  React.js, APIThis fun application i created was more interesting when i had to intergrate the API in some code. The styling is simple and limited as i desired. It is simpler to have fun with linear-gradient as the styling. The take-away of making this app is access to APIs when given the permission to use and continue expand.
- **Spotify-clone**

React.jsThis application was made using React and Spotify api, Spotify Authentication and Material-ui. The project included use of React Context API understanding. With many components to make the app interesting and attractive.
